Detailed Action

Objection to the Specification

The disclosure is objected to because of the following informalities:

- (1) On page 3, line 27, "can by" should read --can be--.

Appropriate correction is required.

Claims Rejection - 35 U.S.C. 103(a)

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 8 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoeldtke (U.S. Patent No. 2,738,815).

Hoeldtke discloses an axe device comprising an elongated shaft (15), a pick (12), a secondary grip (22), a primary grip (20), and a pommel (25) substantially as claimed except the pommel (25) is not adjustable.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make Hoeldtke's pommel (25) adjustable, since it has been held that the provision of adjustability, where needed, involves only routine skill in the art. In re Stevens, 101 USPQ 284, CCPA 1954.

Further, Hoeldtke expresses the desire to make the grip (20) adjustable to be adjustably securable to a proximal end of the shaft (15) movable towards and away from the shaft (15) to respectively shorten and lengthen a length of the shaft (15). Therefore, it would have been obvious to one skilled in the art to also make Hoeldtke's pommel (25) adjustable to further facilitate lengthening the length of the grip/shaft (20/15) as one desired.

3. Claims 2, 3, 9, 10, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoeldtke (U.S. Patent No. 2,738,815) as applied to claims 1, 8 and 15 above, and further in view of Santos et al. (U.S. Patent No. 6,073,307).

Hoeldtke's axe device as modified above lacks at least one spacer for adjusting the length of the grip (20).

Santos et al. states (see column 1, lines 53057) it is well known in the art to add spacers to a hand grip for grip adjustment.

In view of this fact, it is obvious to one skilled in the art to further modify Hoeldtke by providing the axe device with spacers for grip adjustment as desired.

Indication of Allowable Subject Matter

Claims 4-7 and 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art Citations

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Porter, French, Higgs, Munzer, Bennett, French Patent '664, German Patent '759 and EP '353 are cited as art of interest.
